A. SAFETY MESSAGES

1. Please read through these instructions before you start.
2. Adult assistance and supervision are recommended.
3. Intended for children of ages over 8.
4. This kit and its finished product contain small parts which may cause choking if misused. Keep away from children under 3 years old.
5. The painted lantern is intended for decorative purposes only. It is not recommended for illumination. Do not install any light source into it.

B. OTHER REMARKS

1. Always work on a solid, level working surface and try to keep the area neat and clean.
2. If clothes are stained by paint then wash them immediately. Dried paint may leave mild stains on clothing even when they are washed. Put on an apron or wear old working clothes as necessary.

C. CONTENTS

1 x lantern of 15cm diameter, 1 x lantern expander, 1 x paint strip, 1 x paint brush and detailed instructions.

D. ASSEMBLY

1. Expand the paper lantern gently as in the diagram.
2. Carefully insert the expander through the big hole with 2 eyelets.
3. Carefully insert the expander slots (convex points) in the eyelets. You may gently bend the expander so that it can fit into the slot. This will fix the lantern in shape. Do this one by one to avoid breaking the lantern's paper. Ask for an adult's assistance if needed.

E. PAINTING

Use a pencil to draft the design on the lantern surface before applying the paint. Be reminded that the pencil tip may break the lantern. Design using your own imagination or refer to the illustration as shown on the package. You may also use your own paint at home to create more colourful designs. Please also refer to the painting tips below.

Caution: When paint is applied on the lantern surface, the water will soak through the lantern surface. The lantern paper will break easily when it is still wet. Thus, it is recommended that you do not dilute the paint with too much water and avoid applying too much paint at one time when painting the lantern. Wait for the first layer to dry before applying the second one. If the lantern is broken accidentally, you could use stationery adhesive tape or tissue paper to repair it.

PAINTING TIPS

Follow the colour mixing guide below to produce more colours. Some of the following guides may not apply to your kit if the required colours are not included.

Green = Yellow + Blue
Orange = Yellow + Pink
Purple = Blue + Pink

Lime Green = Yellow + a little Blue
Turquoise = Blue + White + a little Yellow
Brown = Pink + Yellow + a little Blue

Mix the colours with White and Black to make them look lighter or darker respectively. Do not mix too many colours together as it will make the final colour look muddy. For best results, apply more than one layer of paint but wait until the first layer is dry before applying a second coat. It is always easier to paint a darker colour on a lighter colour background than the reverse. Always wash your paint brush before mixing or applying a new colour. Prepare a small cup of water for this purpose. It is also a good idea to use a mixing tray for mixing paints. Close the pot lids tightly to prevent the paint from drying up. If the paint becomes dry, dilute it with a few drops of water. You may also add a small drop of dishwashing detergent to the paint and mix it. This will help the paint adhere to the surface better.

QUESTIONS AND COMMENTS

We treasure you as a customer and your satisfaction with this product is important to us. In case you have any comments or questions, or you find any parts of this kit missing or defective, please do not hesitate to contact our distributor in your country, whose address is printed on the package. You are also welcome to contact our marketing support team at Email: infodesk@4M-IND.com, Fax (852) 25911566, Tel: (852) 28936241, Web site: WWW.4M-IND.COM
